

This is an update from the Wellpinit School District on March 29, 2021

Wellpinit School District has learned of a confirmed case of COVID-19 in the Wellpinit Middle School. We are following all safety precautions and requirements outlined by the Department of Health and the David C. Wynecoop Memorial Clinic.

When there is a confirmed positive COVID-19 case, our contract tracing team immediately conducts an investigation to compile a list of close contacts. A close contact is defined as being within 6 feet of another person for more than 15 minutes. Any individual considered to be a close contact received a separate communication with additional information regarding testing and quarantine requirements. Staff and students who were not notified by the contact tracing team have been determined not to have been a close contact. A letter explaining these things has been sent home with all middle and high school students. As of now, this situation is considered confined and not considered an outbreak.

We will continue with our safety and cleaning protocols including wearing a mask, good hygiene and distancing. Thank you for partnering with us to keep everyone safe and remember to continue to do the daily screening and if you have any questions on testing, please call the clinic.
